"... the journal wishes to offer the possibility of permanent contact with prestigious universities, research centers, economic and industrial companies from around the world, which should facilitate the initiation of research and development projects, technology and know-how transfer in the field of environmental engineering and management in the perspective of Romania integration in the European Union. The Journal is therefore an enthusiastic newcomer that aims to establish the benchmark in the field. We hope the EEMJ will be successful and we believe that the following elements are crucial to achieve this success:

- journal scope: the journal seeks to cover a wide range of topics regarding environmental engineering and management in the broad sense and particularly emphasizes interdisciplinary studies, and we hope these will be attractive both to readers and to those submitting manuscripts.

- journal structure: EEMJ will publish original research, short communications, reviews, web alerts, book reviews, meeting reports. The journal will also provide a forum for the open debate of timely and/or controversial issues. The original research articles will be complemented with information about the findings and advances regarding methods and techniques, equipment, apparatus for environmental studies and research, presented in advertising/commercial pages, that will increase and broaden the interest in the journal, for the Romanian suppliers and users, as well as for those from abroad.

- editorial board: EEMJ is strongly supported by a dedicated international editorial board consisting of renowned scientists. Thus, we need to ensure the highest quality standards of the journal and provide prompt, detailed, rigorous assessments that allow rapid editorial decisions and result in significantly improved manuscripts. Also we wish for the editorial board members' further support, by providing the editors with advice and suggestions and by submitting some of the best work of their own laboratory/activity." from the [Editorial](#) of the first issue, March 2002
